

## Preface

o.Univ.-Prof.Dipl.-Ing.Dr.techn. Roman Jaworski, Dipl.-Ing. Helmut Hainitz,  
o.Univ.-Prof.Dipl.-Ing.Dr.techn. Klaus Riessberger

### Preface

1

## Network

Univ.-Doz. Dipl.-Ing. Dr. Peter Veit, Graz

### The "strategy permanent way" - project of the Austrian Federal Railways (ÖBB)

12

Dr. Gérard Presle, Vienna

### The route to a transparent permanent way

13

Dipl.-Ing. Werner Hanreich, Vienna

### Modern permanent way inspection using the EM 250 track recording coach

17

Dr. Bernhard Lichtberger, Linz

### Improvement of Electronically Assisted Surveying

27

Univ.-Doz. Dipl.-Ing. Dr. Peter Veit, Graz

### Research into forecasting the quality development of permanent way

33

Dipl.-Ing. Florian Auer, Vienna

### Quality analysis of track geometry for maintenance optimisation

38

Dipl.-Ing. Dr. Peter Pointner

### Rolling contact fatigue and wear: economic and technical aspects

46

Ing. Friedrich Papacek, Ing. Franz Stelzer

### Plug-and-play systems – an intelligent solution for turnouts

53

Technology innovation through optimised life-cycle costing

o.Univ.-Prof.Dipl.-Ing.Dr.techn. Klaus Riessberger, Graz

### The project "Frame Sleeper Track"

56

Dipl.-Ing. Dr. techn. Herbert L. Hasslinger, Senatsrat Dipl.-Ing. Hans Stockinger, Vienna

### Measurement proof for the superiority of a new track alignment design element, the so-called "Viennese curve"

61

Ing. Rainer Wentz, Vienna

### Development of Machines for Construction and Maintenance of Track

72

Dipl.-Ing. Michael Wieshart, Vienna

### Balanced Scorecard (BSC) in the Permanent Way Department of the ÖBB

82

Ing. Michael Wogowitsch, Vienna

### Implementation of strategies for permanent way maintenance

89

Dipl.-Ing. Michael Zuzic

### Closing Words

95
